Kenneth and Anna

Attached are spreadsheets of the sample data collected by the PRP for the Falcon RI. I would like for you to review the data and help me determine what data we will need the contractor collect in order to complete the RI. I will also need to discuss how to schedule the sampling given the limited funds available for sampling. I expect that we will need to have at least 2 sampling events to collect the data we need to complete the RI. Please let me know when you would be available to go over the data and what you need for me to be looking at as well.

Thanks

Brian:

Attached are Excel spreadsheets of the detected compounds from the previous work performed by the PRP's. The spreadsheets are divided by AOC and each spreadsheet is divided further by media and COC. Let me know if you have any questions or need anything else.

Thank you,
Bob Owens

Robert

Attached is a pdf of the signed FSP and QAPP for the Falcon Refinery RI/FS. Please note that EPA would like to schedule a meeting to discuss the sampling schedule after we have had an opportunity to review the PRPs original data. Please let me know if you have any questions and or when the PRP data set will be available for EPA's review

Thanks
